Dear Mr Gardiner

RE: Cancellation of certain D & OP Reserves

In 1994 this Agency introduced the Protected Areas Regulation as part of the Nature Conservation Act 1992. One category of protected area created at that time is Resources Reserve. The Resources Reserves so created were previously various Departmental & Official Purposes Reserves gazetted under the Land Act. A copy of the original schedule from the Regulation is attached for your convenience. The entries struck through have since been upgraded to other protected area categories (ie amalgamated with existing National Parks).

It has now come to my attention that at least some of the former D & OP Reserves so converted have not been cancelled or otherwise deleted from the register of such reserves. It would be appreciated if this could now occur to avoid duplication of the entries for these areas.

If the Lot/Plan descriptions for these areas is insufficient for you to identify the former Reserves, please advise me and a further search of EPA records will be undertaken.

Thank you for your assistance.

Yours sincerely
