<b>Fin YTD 14/15</b>	<b>(ALL ROPS)</b>		<b>72</b>	<b>27,464 ML</b>	<b>3%</b>	<b>\$1,519 /ML</b>

This table does not include water allocations associated with the sale of enterprises as a whole e.g. the sale of land and water comprising an irrigation farm.

# This column identifies the water allocation groups within each water management area that have had water trading activity to date; data is presented by water allocation group.

@ This figure represents the volume of unsupplemented water transferred during the reporting period as a percentage of the total volume available for transfer. For each Water Allocation Group 'total water available' means the volume available for the whole water management area; for the Period Total this means the total available for the entire ROP area; for the All ROPs total this means the total available for all ROP areas combined. This percentage figure is rounded up or down to the nearest whole figure.

\* This figure is a weighted average and is used so that the price is not overly distorted by very large and very small prices per ML. A value of \$0/ML indicates transfers for nil consideration e.g. by way of gift.

~Condamine Balonne TWMA refers to the Condamine Balonne Tributaries Water Management Area.

^ WPBN refers to the Warrego, Paroo, Bulloo and Nebine systems.

For the Water Allocation Group descriptor/ class please refer to the relevant Resource Operations Plan.

**Disclaimer:** This document has been prepared with all due diligence and care, based on the best available information at the time of publication. The Department holds no responsibility for any errors or omissions within this document. Any decisions made by any other parties based on this document are solely the responsibility of those parties.

## Transfer of Ownership - Land and Water

In addition to the trade of water separate from land, water allocations can also be traded together with land as a 'going concern'. The table below presents the number of transfers of water and land together along with the total volume of water entitlement transferred and the portion of the total available water those transfers represent in each ROP area.

ROP	Number of Transfers	Total Volume (ML)	Volume Turnover (%) <sup>*</sup>
Barron	3	115.8	<1%
Border Rivers	15	8825	6%
Burnett	11	687	<1%
Condamine-Balonne	32	11862	2%
Fitzroy	8	4919	3%
Logan	5	558.2	3%
Pioneer	2	461	8%
<b>Fin YTD 14/15</b>	<b>76</b>	<b>27,428 ML</b>	<b>3%</b>
Fin YTD 13/14	45	30,825 ML	3%

\* This figure represents the volume of unsupplemented water allocation traded with land during the reporting period as a percentage of the total volume of unsupplemented water available for transfer.

^ WPBN refers to the Warrego, Paroo, Bulloo and Nebine systems.

For the Water Allocation Group descriptor/ class please refer to the relevant Resource Operations Plan.
