Section 10 Single integrated operation confirmation

Will the activities be undertaken as a single integrated operation?

☒ Yes ☐ No

Single integrated operation occurs when all of the below criteria are met:

- (a) the activities are carried out under the day-to-day management of a single responsible individual, for example, a site or operations manager;
- (b) the activities are operationally interrelated;
- (c) the activities are, or will be, carried out at one or more places; and
- (d) the places where the activities are carried out are separated by distances short enough to make feasible the integrated day-to-day management of the activities.

² ERAs with eligibility criteria and standard conditions are listed at: www.business.qld.gov.au (use the search term "eligibility criteria").

EA0002030 Amendment Application

Attachment – Supporting information

9.2. Details of the ERA to be added.

Compliance with Standard Conditions

This application is for the addition of three mining lease applications being ML 100253, 100254 and 100255.

None of the mining leases being added can meet the criteria for standard condition A13. ML 100253 is outside of the boundaries of a State Heritage Place by less than 15 metres. ML's 100254 & 100255 both encroach into the same State Heritage Place, being part of the Palmer Goldfield Mining Landscape.

In making this application, we are applying to vary condition A13 in relation to ML 100253 to allow mining within the 1km buffer zone and for an exemption certificate in relation to ML 100254 & 100255 to allow for activities to be carried out within the State Heritage Place.

Single Integrated Operation

Criteria for single integrated application

The alluvial mining activities will be carried out under the day to day management of Terry Fitzgerald. The permits are for alluvial gold mining and therefore operationally interrelated. All activities are located on within the Palmer Goldfields Resources Reserve properties and are within an hours drive from each other.

Section 22 – Environmental values

A review of maps for environmentally sensitive areas, regional eco-systems and strategic environmental areas shows no significant areas of concern within close proximity to the mining leases.

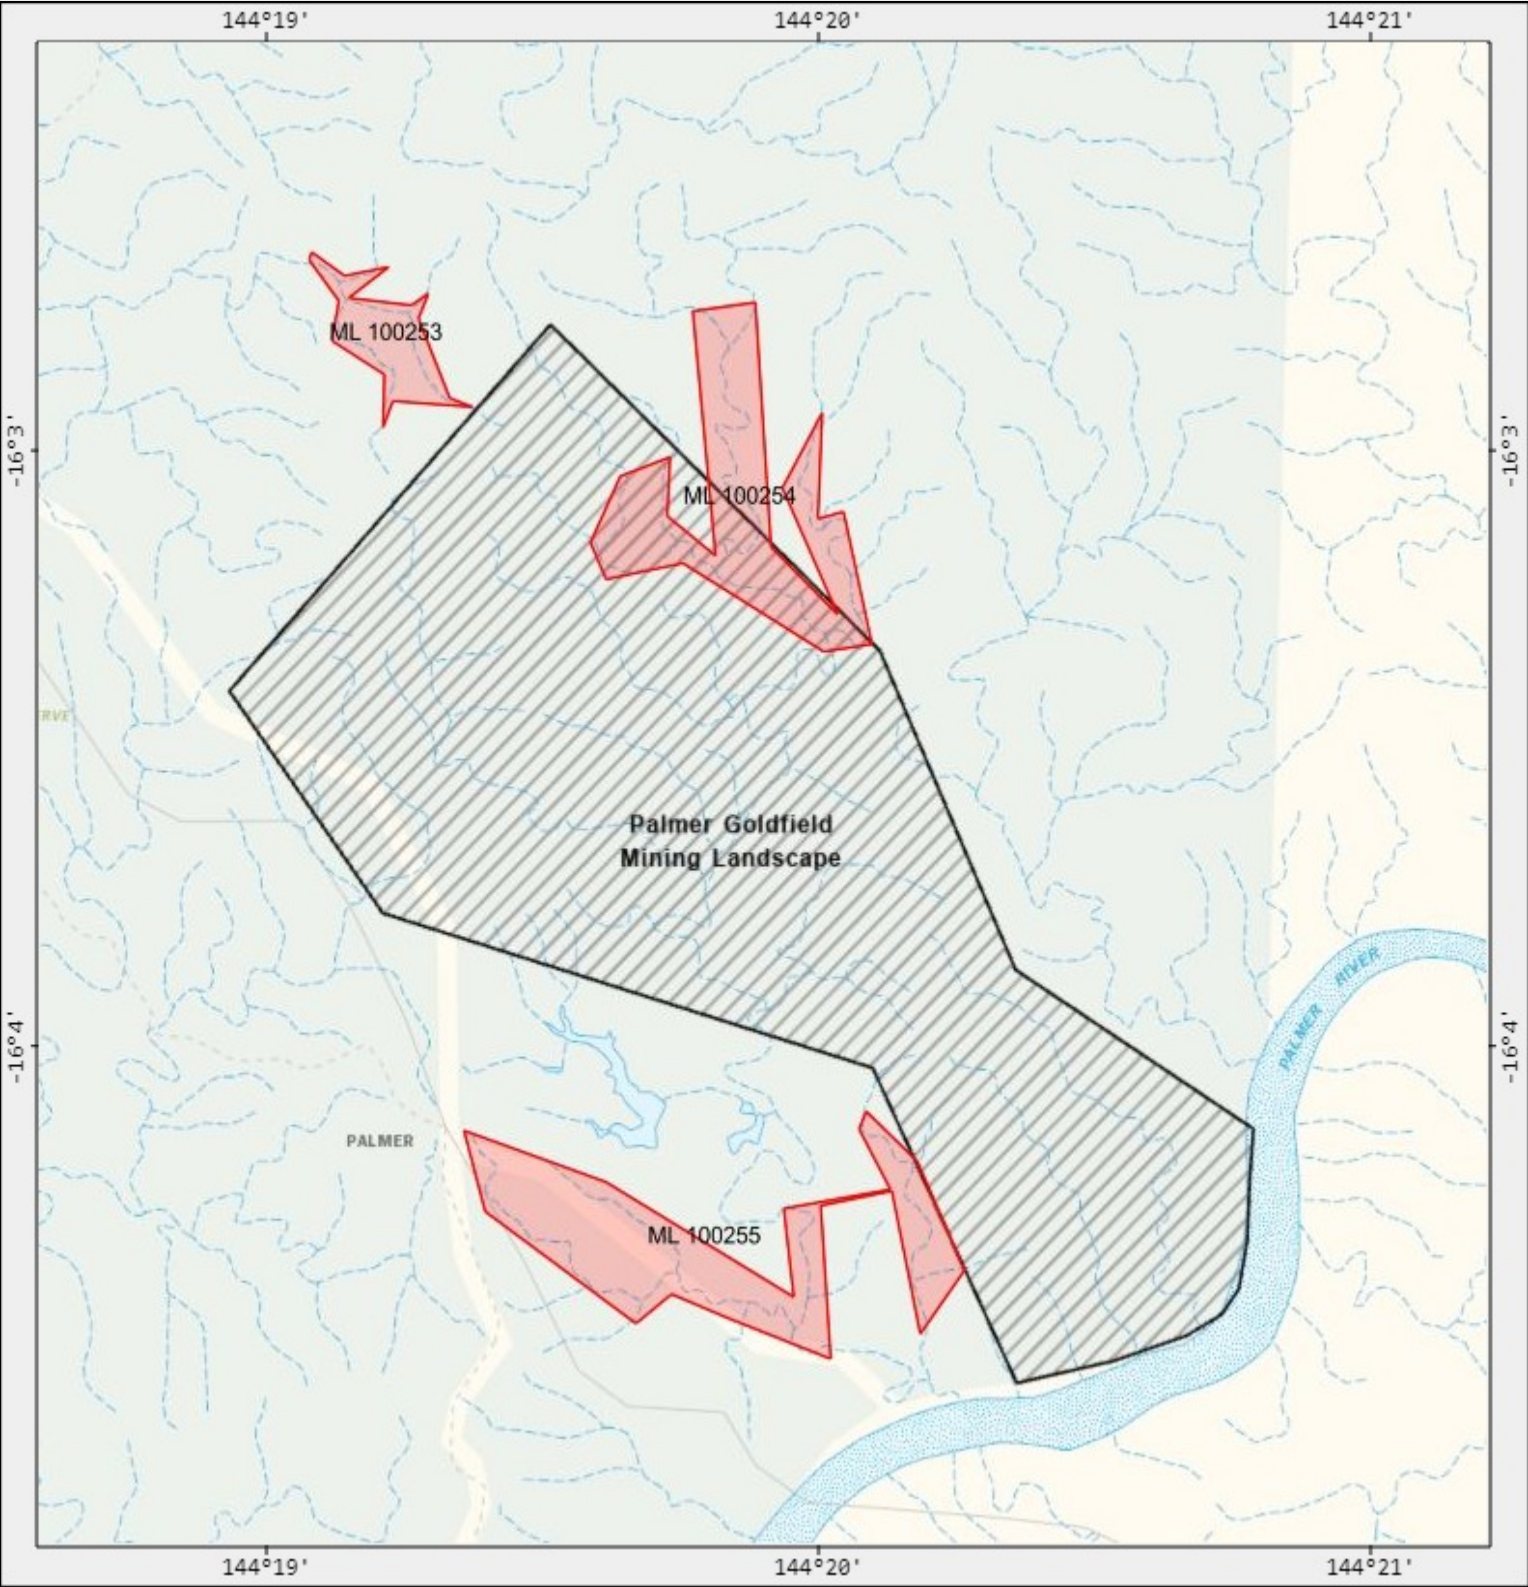

Environmental values such as water, groundwater, wetlands, air, acoustic and waste are not going to be significantly affected by the addition of this application to the existing environmental authority. This area is an alluvial mining field with a number of existing mining operations on and surrounding the underlying land tenure. Land use will be affected in a minor way throughout seasonal mining operations. Mining will not occur throughout the wet season while the alluvial channels are flowing, and access is restricted.

Section 23 – Waste

No additional waste will be produced with the addition of the applications for ML 100253, 100254 & 100255.

Good afternoon Helena,

Following our discussions last week, where we were asked to consent to the reduction of application terms for mining lease applications held by Terrance Fitzgerald, I propose the following application terms.

ML 100253 'T-Cal' – We propose that the term of this application remains the same as applied for – 8 years.
ML 100254 – '3 Gullys' – We propose an amendment from the applied for term of 14 years, to a term of 12 years.
ML 100255 – 'Little Creek' - - We propose a reduction of the applied term of 18 years, to a term of 14 years, there is a possibility of renewal being required.

Regards
