

# Simtars Occupational Hygiene Services

The premier supplier of occupational hygiene services to industry over the last 30 years

**Simtars**

# Class leading occupational hygiene services

Occupational hygiene (or industrial hygiene) uses science, engineering, safety and effective communication to protect and promote worker health. Simtars' expert team of occupational hygienists design practical solutions for complex problems to help keep your workplace safe and comply with health and safety regulations.

**Simtars** provides wide-ranging expertise in risk assessment, specialist advice and exposure assessment programs that will provide your organisation with the security it needs to meet its obligations.

**Simtars** highly trained and professional occupational hygienists use a client focused and engaging approach to deliver quality services across a diverse range of sectors.

With over 30 years of providing occupational hygiene services, Simtars is a leader in its class. The quality of our NATA accredited services and people, attention to detail, and the ability to provide your business with the right advice is what sets us apart from other providers.
